

JAGRATI

Shaping the true you!

Objective

To address the stereotypical attitude of the Indian society towards education through a holistic educational approach which encourages choice of careers among the youth.

Jagrati through its activities & effective counseling, aims to help the youth of India in taking conscious career decisions based on their true potential.

About us

Catching thoughts, germinating them to action, recognising passion, in due process cozying up to them and culminating it into a blossoming career of choice and love - a lever that does just this

“JAGRATI: Shaping the True You!”

Jagrati is an amalgamation of 3 concepts- Radical Thinking, Futuristic Payoffs and Pragmatism. Started by a group of motivated young professionals from across fields with a common goal -

• To add value to our Education System.

Jagrati is the manifestation of a dream by a dreamer who dares to realise - Our founder, Sandhya P Nagar. A brainchild of our Founder, Jagrati is a team of dedicated minds inspired to bring about a change in the current scenario of our Indian Education System.

The Backdrop

India is often recognized as a “Young Nation”- having a youth majority. A densely populated country like India has immense untapped potential and we at Jagrati believe India is incognizant of her own ability. With a man power of over 1.2 billion, it is ironic that we suffer from dearth of recognition of talent.

Now the phrase 'dearth of recognition of talent' may seem controversial and perplexing. To rest those thoughts, here we are addressing a basic problem every person faces at least once in a lifetime.

My career - imposed or a choice made?

There is a great divide between what we want and what we do in order to survive. This word survive has got a different connotation in the Indian context. Socially we are accustomed to work towards securing the basic needs. No doubt it is paramount to do so, but in doing so we seldom look the other side – passion & creativity.

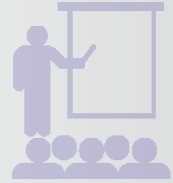

INTELLIGENCE ASSESMENT PROCESS

STEP

01

Intelligence Induction

Elucidate Multiple Intelligence Theory to the parents and students. This involves educating and creating awareness about the types of intelligence a person possesses, which is targeted to help the students discover their interest areas.

STEP

02

Intelligence Activities

We conduct activities which are designed to include a combination of multiple intelligence theory based activities in a congenial environment

STEP

03

Intelligence Assessment Report

This report gives us an in-depth view of the student's current intelligence levels which is further analyzed by our team of experts to generate an 8-Intelligence based Career Report.

STEP

04

Post Assessment Mentoring

Student Counselling:

The student is counselled about the 8 intelligence traits that one possesses by giving equal importance to each intelligence trait.

Parental Counselling

Here we counsel the student's parents by creating awareness among them of the various career options available based on their ward's true strengths

The Jagrati Advantage!

It is time to truly embrace the fact - our society hasn't grown to accept the career choices one makes stemming from passion as it is always pitched against the economics of survival. Jagrati has just the right solution - The Multiple Intelligence theory.

The theory of multiple intelligences was developed in 1983 by Dr. Howard Gardner, professor of education at Harvard University. It suggests that the traditional notion of intelligence, based on I.Q. testing, is far too limited. Instead, Dr. Gardner proposed eight different intelligences to account for a broader range of potential in children and adults.

At Jagrati, the MI method forms the basis of all of our training and activities. We take pride in our work when we say - "Jagrati is the only organisation in Asia that uses MI theory's innovative ways to perform practical assessments to train children helping them chart a path between their true potential and their career choices. By doing this we have proved that we can help in evading a 6-year gap between the start of your career and the actual one you want to pursue!

As we venture towards this cause, we hope to channelize our efforts, utilize our findings, nurture the students and help build- A better tomorrow!
